OPFOR Smartbook: Chinese Military **NEW!**

Chinese Forces, Operations & Tactics

For over two thousand years, China has been surrounded by enemies, adversaries, and other competitors. Invasion, occupation, raids, and other incursions into Chinese territory were commonplace. The People's Liberation Army (PLA) views protecting Chinese sovereignty and security as a sacred duty. China traditionally viewed military resistance as an affair for the entire population: mass resistance, guerrilla warfare, and winning a war of attrition.

OPFOR1 topics and chapters include the strategic environment (understanding China, defense & military strategy, strategic & operational environments, territorial disputes), force structure (PLA: Army, Navy, Marine, Air Force, Rocket Force, Strategic Support Force), system warfare, information operations, reconnaissance and security, offensive and defensive actions, antiterrorism and stability actions, equipment and capabilities (maneuver, fire support, air defense, aviation, engineer and chemical defense, network and communications, and special operations forces).
